The Athena Supine Breast System includes a special headrest that can facilitate both medial and lateral head placement.

KlarityATHENA™

WINGBOARD

The Athena Wingboard is also available as a separate baseplate. It attaches easily to the Breastboard and can be used as a standalone device.

Athena Wingboard

KlarityATHENA™

SUPINE BREAST SYSTEM

The Athena is made of lightweight carbon fiber. MR Compatible versions are also available.

Both the Athena baseplate and the Athena wingboard are compatible with all S-type head masks.

The T-handle can be adjusted both horizontally and vertically at multiple heights.

Elevations at 5°, 10°, 15°, 20°.

Adjustable hand grips offer comfortable and reproducible lower arm placement for one-arm overhead positioning.

The V-shape at the hips relieves pressure to improve both comfort and stability. A 70cm bore can be accommodated when elevated at 5°.

The Klarity Athena Supine Breast System offers flexible solutions for better customized positioning.
